Walter Nash Comments

The Cyklos GPM315 is a solidly constructed A3+ manual creasing machine, ideal for short runs and occasional use. The perforating facility is also a good option for production of short run tickets and vouchers etc.

As this card creaser has a maximum creasing width of 315mm, users requiring similar capabilities but with the option to crease A3 on the long edge (e.g. long tall menus) should consider the **Cyklos KSL 435 model.**
